

TravelAI provides comprehensive point-of-sale visibility into all rates available when your travelers shop for travel.

TravelAI answers key questions that help travel managers optimize their travel programs.

Sourcing

- Are you sourcing your contracts from the right suppliers?
- In your top markets, are there properties you should (or should not) be negotiating with?
- Are there nearby hotels with better rates?

Rate Performance

- Are you getting good rates?
- How do your rates compare?
- How much could you save by moving to a dynamic rate?

Policy

- How often are you getting your preferred rate at booking?
- Are there available savings by switching bed or room type?

You can quickly see whether **suppliers** are performing as contracted and if **travelers** are complying with policy.

How Yapta Customers Save with TravelAI

Saved Nearly
\$1 Million
with TravelAI

International Energy Company

Using TravelAI point-of-sale data and analytics, the company's travel manager zeroed in on problem areas, took corrective action and realized nearly \$1 million in savings for 6 hotels.

Increased
Compliance,
Decreased
Nightly Rate

Sanmina Corporation

With TravelAI, the manufacturing solutions provider reduced preferred properties from 120 to 82, identified over \$100,000 that travelers spent at non-discounted rates, and decreased hotel nightly rate in top cities by 16%.
