

Yapta's dynamic price assurance technology enables you to act on price drop alerts for hotel savings either manually or automatically.

With Yapta's auto-rebooking capability, you can boost savings and reduce your agent support costs, without disrupting the traveler's experience.

Time savings

Yapta's technology can immediately rebook eligible savings opportunities directly within the GDS 24x7, without waiting for an agent to review or the need to extend office hours.

Happy travelers

With Yapta's BestMatch™ functionality, your TMC can simply "green-light" specific hotel reservations for auto-rebooking, honoring the elements most important to your company (bed type, room type, amenities and more).

Better bottom line

Clients using Yapta's automated capability see a 30% increase in realized savings and a 35% decrease in agent costs.

How hotel auto-rebooking works

Working in the background, Yapta identifies savings opportunities that meet your preconfigured parameters. Yapta's automated technology can immediately rebook savings eligible hotel reservations directly within the GDS, without the need for an agent to assist. Your TMC continues to maintain complete insight into all transactions.
